T24 Wireless Telemetry Handheld Display

The **T24-HK-S** is an IP67 rated, rugged handheld display designed to work with all Mantracourt T24 transmitters.
As standard it operates in roaming mode, instantly displaying data from up to 12 nearby T24 transmitters.

The **T24-HK-S** is suited to both under hook and multi point weighing.

For **simple** use cases, users can view current and peak loads, switch measurement units, and receive overload alerts.

Continuous development: Our new flagship in Wireless Telemetry handhelds with years of planned development and support.

Customisable Inputs: Define up to 12 inputs with different settings such as calibrated units or overload.

Simple Setup: Achieve quick setup directly from the handheld, or use the free toolkit software via USB for more complex configurations.

Enhanced Functionality: Hidden menus for simplicity, but unlock full functionality with a password or the toolkit.

Customizable Interface: Personalize the display by loading alternate layouts using the toolkit.

Built-in overload warnings and error alerts, audible or via vibrating alarm ensure safety, even when the screen isn't visible.

Mantracourt®

T24-Handheld Display Standard

The T24-HK-S is our next-generation wireless telemetry handheld display.

Avaliable for testing Q4 2024
